

## QuartersForWater™ Ideas:

A ChangeALife Uganda representative will speak at your school before kicking off the event.

### Education ideas

- Watch YouTube video of students celebrating running water at St. Lawrence School: [https://youtu.be/\\_BNJ3nhjWsw](https://youtu.be/_BNJ3nhjWsw)
- Select a month, week or day to celebrate such as World Water Day in March
- Set up a rain barrel in the schoolyard and collect water. See how long it takes to fill a barrel.
- Create your own WASH teams – Learn about the importance of good hygiene and hand washing. Design “wash your hands” messages and posters. We will send you a sample WASH kit that our Ugandan students use.

### Fundraising ideas

Set a goal:

- Get Sudsy! Soap and Latrine Cover Supplies: \$10.
  - Provide students with WASH Team kits: \$25.
  - Supply the clay bricks to build a water purification system: \$25.
  - Supply the sand and cement to build a water purification system: \$150.
  - Supply a 1,500 Liter water harvesting tank to collect rainwater: \$285.
  - Test the filtered rainwater to see if it is safe to drink: \$120.
  - Build a toilet block (cement latrine): \$1,200.
  - Build a family both a water harvesting system and a water purification system: \$2,000.
- During the campaign, post a water tank (art teacher or students create) and “fill the tank” with raindrops – participating student names and/or family names are placed in the raindrops.
  - Play WASH bingo for quarters.
  - Have the school principal launch a “challenge” to the school. If the school meets its goal, the principal determines the reward.
  - Have “Spirit days” through the week while collecting – i.e. students can donate a \$1.00 to wear flip flops or jeans (if they usually wear a uniform)
  - Have a “Quarter Wars” between classrooms and collect daily. Winning classes get recognition throughout the school.
  - Walk for Water – Students can ask sponsors to donate to the cause and walk to raise funds.
